ELEVATE EFFICIENCY.
ACCELERATE GROWTH.

COLORSTREAM 8000 SERIES

SMART CHANGE STARTS HERE.

ELEVATE EFFICIENCY.
ACCELERATE GROWTH.

Elevate efficiency with the ColorStream 8000 series. Meet tight service level agreements and reduce market price pressures with uninterrupted productivity and increased output volumes. Strengthen your position in the market by delivering superior print quality output, with native 1,200 dpi printheads at print speeds of up to 525 ft/min. That's an output of 2290 letter images per minute.

Productivity up to 525 ft/min

Native 1,200 dpi printhead resolution

Efficiency in ultra-short runs

Application versatility

Focused on sustainability in manufacturing and press operation

Proactive maintenance

Explore productivity

More jobs. Shorter runs. Tighter deadlines. Application versatility.

Whether you're a print and communication service provider, a corporate enterprise or data center, a dedicated publication printer, or an all-round commercial printer, to stay ahead you need a press that enables you to set up jobs, switch media, and personalize documents easily. You also want to run your printer with minimal operator intervention. These are just some of the aspects in which the ColorStream 8000 series excels.

Explore stunning quality

Create breathtaking applications

The new native 1,200 dpi printheads deliver stunning, consistent print quality from the first page to the last. In addition, the powerful SRA controller RIPs print data with fully variable content at rated speed. With control over every nozzle in the printheads, the controller is able provide a more consistent droplet size and placement, forming the basis for striking print quality.

- Native 1,200 dpi printhead resolution
- A wide range of uncoated and inkjet-optimized media from 40 to 160 gsm
- New water-based pigment inks to achieve impressive quality on uncoated paper without pre-treatment
- Optimized ink formulation for light-weight media and heavier stocks

Explore efficiency

Minimize waste and maximize value

Through its unique combination of flexibility and quality, the ColorStream 8000 series simplifies and accelerates your transition from monochrome to full-color digital print. Capitalize on the waste-free print pause, printing in speed ramps, and the Canon HeadSafe technology for highly reliable automated operation.

- Return on investment
- Effective ink management and small ink droplets
- Energy-efficient drying process
- Automated print head cleaning to minimize ink waste and secure optimized print quality

Explore sustainability

Pursue our common goal

Sustainable design is one of the key aspects of the ColorStream 8000 series. Not only is it manufactured using solar energy and long-life components, it is also produced for robust productivity, low labor investment, low energy consumption, and minimized paper waste.

- Waste-free print pause and printing in speed ramps
- Direct imaging process that enables color consistency and optimized results
- On-demand printing, to eliminate waste and obsolescence
