Canon imageRUNNER ADVANCE C7000 series

High volume multifunctional colour printer for the office

"Based on your specific requirements, I can offer a complete product package that is tailor made to fit comfortably in your company workflow."

George - Océ account manager

A Canon office multifunctional gives you the power to perform. Bringing big, bold, high-impact colour right into your office. Stir in the Océ expert knowledge force and you also gain the people to succeed. Document specialists who understand your needs. And add personality to your printers. So that your colour printing systems integrate seamlessly into your total knowledge-management infrastructure.

Océ and Canon

In 2010, Océ joined the Canon family to create the global leader in the printing industry. This compelling combination combines a 130-year heritage of Océ customer-driven innovation with the vast technical and financial resources of Canon. The result? Unmatched scale in research and development, manufacturing and distribution, together with accelerated development of new innovations and the industry's broadest choice of hardware, software and workflow solutions.

Produce bigger, better, bolder colour in your office

The imageRUNNER ADVANCE C7000 series delivers bigger, better, bolder colour (and black & white) documents, professional finishing, and large and flexible media input to larger offices, departments or workgroups. Featuring printing, scanning, copying and faxing. Available at speeds of 55 or 65 ppm in black & white and colour.

Keep control of all your communications in-house

Say goodbye to pricey outsourcing. With the sophisticated finishing and large and flexible media capacity of the imageRUNNER ADVANCE C7000 series, you'll be able to churn out colour brochures, reports, even complete mailings in no time. And auto colour sensing means you'll only use-and pay for-colour when you need it. Your documents will be secure at all times, since the system features options such as hard disc encryption and mirroring, protected data and device access for printing and faxing, illegal copy and scan protection and more. Gain equal control over your system, or your whole fleet, including third-party devices, with Canon iW Management Console, uniFLOW and other smart software that help you manage your whole printer park from a distance.

Effectively keep up with your greatest document challenges

Throw any kind of document at the imageRUNNER ADVANCE C7000 series and the system handles it effectively. The standard system provides a solid, robust colour and black & white printing solution, including PS and PCL processing, and handles a wide range of media sizes and weights at rated speed. A paper capacity of up to 6900 sheets means large jobs proceed without interruption. It's effective performance you can depend on to meet your most-complex document challenges.

Canon imageRUNNER ADVANCE C7000 series

High volume multifunctional colour printer for the office

Free up valuable time with seamless system integration

Gain precious time across your office thanks to the easy integration of the imageRUNNER ADVANCE C7000 into your existing work ways. Based on an open platform, it smoothly fits into your fleet. Customise settings based on your company standards, with programmable settings for preferred network locations, folders and assignments. So users can quickly produce their documents and move on to other, business-critical, tasks.

Streamline communication tasks with convenient operation

Favourite buttons, company-defined templates and other convenient features ensure that the imageRUNNER ADVANCE C7000 series produces the documents users want-without confusion or delay. The full-colour, customizable user interface offers tutorials, thumbnail previews and predefined settings, so you need not spend your precious time at the printer. While an intuitive remote user interface, and a Canon universal printer driver, provides the same functionality and convenience from the desktop.

Lower your carbon footprint with cutting-edge sustainability

Power doesn't mean energy inefficiency. The EPA ENERGY STAR®-compliant imageRUNNER ADVANCE C7000 series sports a wide range of sustainability features: low power usage, sophisticated digital applications (print-to-email, -pc, -server, iFax, etc.), and N-up and duplex printing to reduce paper usage. Bioplastic components and recycled plastics in the machine's design help reduce waste, and a preview functionality on the user interface helps prevent misprints and therefore saves paper. You can easily set environmentally friendly options as standard and really impact user behaviour-while reducing your carbon footprint.

Finished output

- Booklets
- Labels
- Transparencies
- Stapling

Electronic output

- Fax
- USB-stick
- FTP server
- Email

Electronic input

- USB-stick
- Fax
- PC / Mac
- Digital document

Options to support your office document workflow

The imageRUNNER ADVANCE C7000 series meets your needs in all aspects, including standard support for PS and PCL. With a choice of 55 or 65 ppm, professional finishing (including booklet making, stapling, hole punching and document folding and insertion), extra paper capacity and a host of software options to support your workflow. Two optional controllers give you that extra edge in document ripping and printing. With the optional upright operator panel and the specialised software tools for these controllers, you can revamp your high end office device into a production print system.

Main hardware options:

- High speed document feeder
- A4 or A3 side paper deck
- Standard tab feeding and envelope support
- Staple finisher
- Booklet maker
- 2/4 hole punch unit
- Document insertion unit or Document insertion and folding unit
- Removable hard disk
- Additional hard disk (for Hard disk mirroring only)
- Fax kit
- Memory card and stick reader
- Canon card reader
- Memory upgrade to 1 TB
- Internal imagePASS controller
- External colorPASS controller

1 High speed document feeder
The 300-sheet capacity document feeder supports scanning of up to 140/200 originals per minute in colour and black & white.

2 Workflow integration
Intelligent support of file sharing and document reproduction, taking into consideration current and future security requirements, Device management and fleet control software for centralised control.

3 Operator panel
The large 8.4 inch colour touchscreen is easy to use and provides full control over your print job. An optional 10.4 inch upright operator panel mounted on a swing arm provides more flexibility and usability.

4 Controller
Standard Canon controller with 2.5 GB RAM and 80 GB hard disk with PCL and genuine Adobe® PostScript® 3 support. For advanced colour management and workflow control choose the optional imagePASS or colorPASS controller

5 Large paper input
4 standard paper trays and a bypass tray provide 3400-sheet capacity. This can be extended to 6900 sheets. Media weights of up to 220 gsm in the paper trays are supported.

6 Productive finishing
50-sheet multi-position stapling on both the staple and booklet finisher, with up to 4000-sheet output capacity. Now with optional letter- and Z-folding, sheet insertion and hole punching.

Beyond the Ordinary

**Printing for
Professionals**

Professionals everywhere look to Océ for digital printing and document management. In the office, Océ systems keep the information of business and government moving. In manufacturing, architecture, engineering and construction, Océ wide format printers set the standard while our display graphics systems help people produce banners, billboards and other large, colourful applications. In corporate printrooms, marketing service bureaus and the graphic arts industry, Océ systems print transaction documents, mailings, newspapers, manuals and books on demand at the highest speeds. And Océ Business Services manage the complete document workflow of customers around the world. It all helps you go "Beyond the Ordinary" in printing and document management.
