imageRUNNER ADVANCE C9075 PRO/C9065 PRO

Designed to grow your business.
A brilliant future for digital color print production.

An outstanding investment
To win in today’s marketplace requires the ability to grow your revenue and improve your profitability. Success demands standout performance, stellar productivity, and absolute versatility. Introducing the imageRUNNER® ADVANCE C9075 PRO/C9065 PRO systems—you never imagined your return on investment could be this good.

A revolutionary approach
With a dramatically new platform, the Canon imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems will transform the way you work. Designed to satisfy the specific needs of corporate in-house print facilities, commercial on-demand print centers, and design agencies, these digital color printing systems provide outstanding value in every way.

Delight your customers
Exceptional image quality. An extensive choice of media. Multiple finishing options. From brochures to mailers to catalogs, your output will make a striking impression. And in return you’ll have increased opportunities to grow your business.

Reliable productivity
Your operation will keep humming with these imageRUNNER ADVANCE systems. Exceptional processing speeds keep work moving at a rapid pace. Automated features minimize downtime and maximize productivity. And with Canon’s recognized reliability, you can count on virtually nonstop operation.

Workflow simplified
From start to finish, the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems streamline every part of your production process. With powerful tools and centralized control, operators can smoothly monitor jobs from prepress to finishing. Complicated or repeated tasks can be performed with the touch of a single button. And sophisticated applications ensure that accurate color is achieved with amazing ease and at top speed.

More of everything in much less space
Now, light production environments can enjoy the powerful functionality previously reserved for large production facilities—all within a design that saves space and energy. With Canon’s imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems you’ll have the resources to advance your business—now and in the future.
ADVANCED IMAGE QUALITY

Sharp, rich, amazingly vibrant images. All with Canon’s advanced technologies.

Lots of innovation
Canon’s noted expertise in color imaging and its ongoing commitment to R&D have resulted in a range of advanced technologies that deliver outstanding image quality time after time. Here are a few that make the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems stand out.

Exceptional image quality
Canon’s next-generation imaging systems deliver stunning image quality with astonishing speed. True 1200 x 1200 dpi print resolution produces crisp text with smooth corners, while subtle gradient transitions give images remarkable clarity.

Precise eight-beam red lasers have a small diameter to produce high-quality images with proper shading and accurate registration. Even more impressive, this technology achieves spectacular results without sacrificing productivity.

pQ Toner
Canon’s new pQ toner is oil-free and uses small particles containing micro-dispersed wax, so the toner fixes evenly and lies flat. The result? Sharp, vivid, dense images, improved gloss levels, and a smooth finish.

Reliable color consistency
Critical to your operation is the ability to deliver accurate and consistent color. The imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems make this simple. With Auto Gradation Adjustment, densities and halftones are adjusted to their ideal level. Real-Time Calibration helps maintain this level by making automatic, real-time adjustments during print runs.

Precise registration
Accurate registration is achieved with impressive precision in the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems. A new cassette design ensures that every page enters the printer at the same location, and manual adjustment features offer each user greatly expanded control over alignment. For duplex documents, front-to-back registration can be precisely matched on every paper type within one millimeter, to help prevent images from being misaligned and to give you a professional result.
Keeps running
Slowdowns and interruptions cost you time and money. That’s why Canon designed the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems with a range of automated features that minimize downtime and maximize productivity.

With greater toner and drum yields and remote notification of low supply inventory, you’re always prepared. Even better, toner and paper can be replenished on-the-fly—no need to interrupt a job.

A paper capacity of up to 9,300 sheets ensures that long jobs can run without having to stop for paper replenishment. If the correct paper size or stock is temporarily unavailable, the system can hold that job in the queue and begin the next job without delay. And, when you’re printing on three tabs from a bank of five, the other two can automatically be kicked out to a separate tray.

Reliably ahead
Canon builds in signature reliability. And thanks to remote service monitoring, automated dispatching, and a synchronized hard-drive backup, users can count on virtually nonstop operation. With access to the latest technology and simple, clear upgrades, you can power through your jobs, giving you more time to devote to other business areas.

ADVANCED VERSATILITY

Greater options. Tighter connections.
A host of ways to increase your revenue and profitability.

Greater opportunities
With advanced paper handling and multiple finishing capabilities, the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems handle a wide range of jobs efficiently and cost-effectively. From saddle-stitched booklets to direct mail pieces to marketing collateral, you’ll be able to satisfy your customers’ varying needs. And with the extensive versatility the systems offer, you’ll be able to enter new markets profitably.

The right paper for the job. Enjoy high-quality output whether printing on coated, matte, or specialty stocks in weights from 14 lb. Bond to 110 lb. Cover. Handle sheet sizes from 5-1/2”x 7-1/8” to 13”x 19-1/4”.

A professional finish. Choose from a wide range of in-line finishing options, including multiposition stapling of up to 100 sheets; automatic 2- and 3-hole punching; professional punching with varied punch patterns; preprinted media insertion for covers or page inserts; and saddle-stitching and face-trimming of up to 20-sheet/80-page booklets.

Expanded connectivity

More file formats. Enjoy greater flexibility and accuracy. Using Universal Send, easily convert paper documents to digital form in an expanded range of file formats. These systems support advanced PDF features including Adobe PDF Reader Extensions, Encrypted PDF, Searchable PDF, and more. For outstanding speed across your network, reduce file sizes with High Compression PDF/XPS.

Streamlined job management. Designed to manage workflow for color-centric light production environments, the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems boost productivity. With a complete set of advanced job-management features, tools, and utilities, jobs will move through your shop or office with impressive speed and accuracy.

Customized solutions. Each business has its special needs. Canon MEAP® (Multifunctional Embedded Application Platform) enables the systems to incorporate unique applications, such as cost-recovery and document distribution solutions. By embedding these technologies, users can streamline workflow, eliminate excess hardware, and increase productivity.

Support for the latest technologies. With an eye on the future, Canon is committed to integrating new industry standards to help you grow your digital print business. From creative and submission to finishing and distribution, the imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems are designed to take advantage of existing and cutting-edge technology workflow solutions that enhance efficiency and simplify your production processes.
ADVANCED WORKFLOW

Simple, streamlined, and sophisticated operation. Workflow solutions that meet your business goals.

The best options
It takes the right combination of make-ready tools and processing power to complete the greatest number of jobs each day with the fewest operators. The imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems are versatile and can be configured to meet your unique workflow needs and business goals.

Control from start to finish
The Canon imageRUNNER ADVANCE C9075 PRO/C9065 PRO systems make it simple to manage and reduce print costs. uniFLOW Output Manager software offers features such as the digital job ticket, which allows you to define properties for complex documents, shortening turnaround times, and the ability to analyze the central print queue for optimal job placement. Streamlined job submission, fast document editing, a document archive, and late editing and pagination save time and reduce errors.

Sophisticated color management
Canon's color-management tools will give your work a professional edge. EFI® ColorWise® tools ensure consistent delivery of the most precise, accurate colors. The optional Graphic Arts Feature Set for the ColorPASS controller provides added benefits such as color matching, halftone screening, and paper simulation. And the X-Rite Eye-One Process Control system boasts proven prepress and printing technologies to help you calibrate and maintain on-demand color.

Solutions that propel your business while reducing our environmental footprint—and yours.

**ADVANCED RESPONSIBILITY**

**Reduction of CO₂**
Through its Life Cycle Assessment (LCA) System, Canon has lowered CO₂ emissions by more than 30% over previous models by focusing on each stage of the product life cycle, including manufacturing, energy use, and logistics. These products are designed to be more compact, with less packaging to make transportation more efficient.

**Eco-friendly design**
Canon is making a difference through creative ecological thinking. The imageRUNNER ADVANCE models employ certain components fabricated with 100% recycled plastic from retired products. Canon’s innovative green technologies also include bio-based plastic, a plant-derived compound that replaces certain petroleum-based plastic parts.

**A greener way to work**
A visionary company, Canon knows that the world and the workplace need a greener workflow. The imageRUNNER ADVANCE Series delivers just that. Now light production environments can seamlessly share and distribute digital documents across the globe. And because you can preview files prior to printing, changes can be made before committing toner to paper to avoid print errors.

**Greater energy efficiency**
From the inside out, the imageRUNNER ADVANCE Series is designed for high energy efficiency and stellar performance. The combination of Canon’s fusing technologies and new pQ toner helps to reduce overall energy consumption by minimizing heat and power requirements. The Series’ new duplex color image reader captures superb-quality images at impressive speeds while using less energy than ever. Canon’s new Induction Heating Fusing System reduces power use in digital multifunction systems by up to an astonishing 30% over the previous model.* And when systems are in Sleep Mode, power consumption is 1.5W or less. With advanced technologies present in each model, the Series meets ENERGY STAR® standards.

**Reducing pollution**
All suppliers are required to meet Canon’s stringent Green Procurement policy and environmental terms. This helps Canon exceed the toughest global standards set by the EU RoHS Directive, which requires the restriction of six specified hazardous substances. Canon currently restricts the use of 24 such substances.
