Designed for simple mobile printing

The future is mobile. Mobile working habits are becoming increasingly common in office environments. Smartphones and tablets have enabled new ways of working, yet numerous documents still need printing or scanning. In many companies this is only possible on a desktop PC, which forces mobile workers into a time consuming and inconvenient detour instead of printing or scanning directly from their mobile device. To solve this problem, DEVELOP brings you the ineo+ 368 Series, a colour office system equipped to fully support mobile working habits.

ineo+ 258 fitted with inner finisher

ineo+ 308 fitted with booklet-making finisher and 4-tray paper input

Simple mobile usability

Unrestricted and uncomplicated mobile usability is increasingly a must-have for office systems. Without mobile printing capabilities, mobile users must return to a desktop PC to process data from a mobile device before printing the document. This process is somewhat repeated when a mobile user needs to scan a document to their mobile device. The ineo+ 368 Series introduces simplified printing and scanning to-and-from mobile devices, leveraging Near Field Communication (NFC) technology for one-tap pairing to Android devices, and support for printing and scanning from iOS devices using Apple AirPrint via WiFi. The ineo+ 368 Series is perfectly suited to the mobile workflows of today's and tomorrow's world.

Streamline your workflow with this digitally-ready device

The ineo+ 368 Series will provide you the capability to effectively manage your digital document workflow with high-speed colour scanning and a variety of scan to file types and destinations.

Equip your office MFD with your choice of two scanning options: the DF-629 RADF for scanning at speeds up to 80 opm; or DF-704 for single-pass dual scanning at high speeds up to 160 opm. Its array of scanning features will bring information into your workflow with greater speed and flexibility.

You can scan directly to email, FTP, SMB, and WebDAV using simple command icons on your touch-screen. You can set up distribution programs to scan quickly to individuals, departments and workgroups for simple collaboration on projects. Recall pre-defined settings with the touch of a button from your home screen for fast recall of workflow destinations.

Incorporating the popular Microsoft Office suite of files, you can convert your hard-copy documents into editable files with Scan to Word (DOCX), PowerPoint (PPTX) and Excel (XLSX) (some optional). The optional OCR engine activation will allow you to create searchable files for effective document recall, or even to integrate into existing business processes. A wide range of other scan formats are also available including PDF, Compact PDF, PDF/A, Linear PDF, TIFF, JPEG, and XPS (some optional), to optimise documents for display or archiving.

Further enhance productivity by adding an optional FK-514 Super G3 Fax Kit for single or dual line centralised faxing. Digitise your incoming faxes immediately with selectable formats including PDF, Searchable PDF by option, TIFF, JPEG, and more. Speed up your outgoing faxes with Colour Internet Faxing, PC Faxing, and IP Address Faxing.

Intelligent innovations to save energy and protect the environment

This ENERGY STAR certified series of MFDs provide innovative power saving measures to achieve among the lowest power consumption rates in its class. Enhanced Sleep Mode puts greater sections of the device to sleep. ECO Scan Mode can be activated where scanning is the primary walk-up function. Power-saving consumables and improved LED scanning lighting all help to save energy while serving business needs.

Reduce paper waste with the intelligent XPS Print Preview driver. Eliminate misprints and save paper by checking setting details, on-screen, before printing. It allows you to preview an almost precise image of the output, including stapling and hole-punch positions, to prevent output errors and paper wastage.

ineo+ 368 Series –
The art of mobile printing.

All the document functions you need

Take a closer look at the wide range of standard and optional functions in this easy-to-use office system.

Mobile and cloud support

- > The NFC-ready ineo+ 368 Series supports mobile and cloud printing using the most popular mobile protocols. AirPrint (iOS devices), Mopria (Android 4.4 or higher), Google Cloud Print (optional), WiFi Direct (optional) and embedded NFC authentication. Web pages, photos and PDFs can be printed to your DEVELOP Office MFD using the local network. What's more, mobile workers can register the device on their Google account and print from any location when connected to the internet.

Smart solutions for workflow optimisation

- > DEVELOP's software solutions replace time-consuming manual operations with automated processes. With convert+share, for example, you can scan a document in various file formats and then send the file straight to whatever destination you want, e.g. Google Docs, Evernote or Microsoft SharePoint. And store+find helps you locate any document easily and quickly via a keyword or full-text search facility.

Razor-sharp printouts

- > The print engine and innovative HD toner are finely tuned to deliver razor-sharp 1,200 dpi printouts with brilliant colours and easily readable small type.
- > Quality you would normally expect on specialist production equipment, available on this productive, workflow conscious office device.

Easy-to-use touchscreen

- › With functions such as flick, drag-and-drop and pinch-to-zoom, the tiltable 9-inch colour screen is as simple to use as a smartphone or tablet. The control panel can also be customised for personalised ease of use.

Remote administration made simple

- › The system can be administered via any web browser from a desktop computer. Instant servicing is possible thanks to the display's remote operating function. What's more, the machine's operating panel can be mirrored on a tablet via a dedicated app. Then, for example, a user can choose the settings for a print job even though the printer is somewhere else in the building.
- › Automated metering, toner supply and preventative maintenance notification ensures the system operates with maximum uptime, and with little interruption to your business.

Wide choice of authentication possibilities

- › Secure access to the system is ensured through various means of authentication: passwords, finger-vein scanning, contactless smart cards or embedded NFC authentication. The system's NFC capability means a mobile device can even be used instead of an authentication card.

Peace of mind about data security

- › DEVELOP ensures mobile devices can be used securely in an office environment. With access to secure printing, user authentication and account tracking functions ensured, users can work securely from both mobile and fixed locations. Security features such as IPsec, S/MIME e-mail encryption and IP filtering ensure every form of system communication or document transfer is secure. All data stored on the system's hard disk are protected from unauthorised access by data encryption technology and, if required, data erasure.

Environment-friendly benefits

- › The system's low energy consumption, economical running costs and intelligent environmental concept have earned eco-certificates such as ENERGY STAR – an environment friendliness that is good for your carbon footprint as well as your bottom line!

The chance to enhance your document production!

The ineo+ 368 Series will enhance your document production capabilities and give you a wide choice of media and finishing functions, delivering you an Office MFD tailored to your needs.

Wide ranging paper size and weight support

Print on thin 52gsm paper up to thick 300gsm cover stock and support for A5 media size up to SRA3 for A3 full-bleed originals, preserving margins and crop marks. A maximum paper capacity of 6,650 sheets is enough to handle document traffic on busy days with less reloading. The new LU-302 3,000-sheet Large Capacity Unit can be added to standard paper drawers plus a 150-sheet multiple bypass tray for maximum paper capacity.

Unique Tab Printing feature lets you print on tabbed pages from the bypass tray – you can even insert tab pages within the body of your document for producing complete packs. Save time by outputting the same data continuously from multiple paper trays using Carbon Copy printing.

Maximise in-house productivity with advanced finishing options

Choose from a range of modular finishing options, customisable to suit your business needs.

The FS-534 Compact Staple Finisher provides 50-sheet stapling and can be fitted with a Saddle Stitch Unit to create booklets up to 80-pages and three types of folding functions. The PK-520 Punch Kit provides selectable 2/4-hole punching.

The FS-533 space-saving Inner Finisher provides corner and 2-position stapling for up to 50-sheets. It can be fitted with the PK-519 Punch Kit for selectable 2/4-hole punching.

Simplify device administration with ineo Utilities

Device administration is simple with our suite of ineo Utilities, included with all A3 ineo devices.

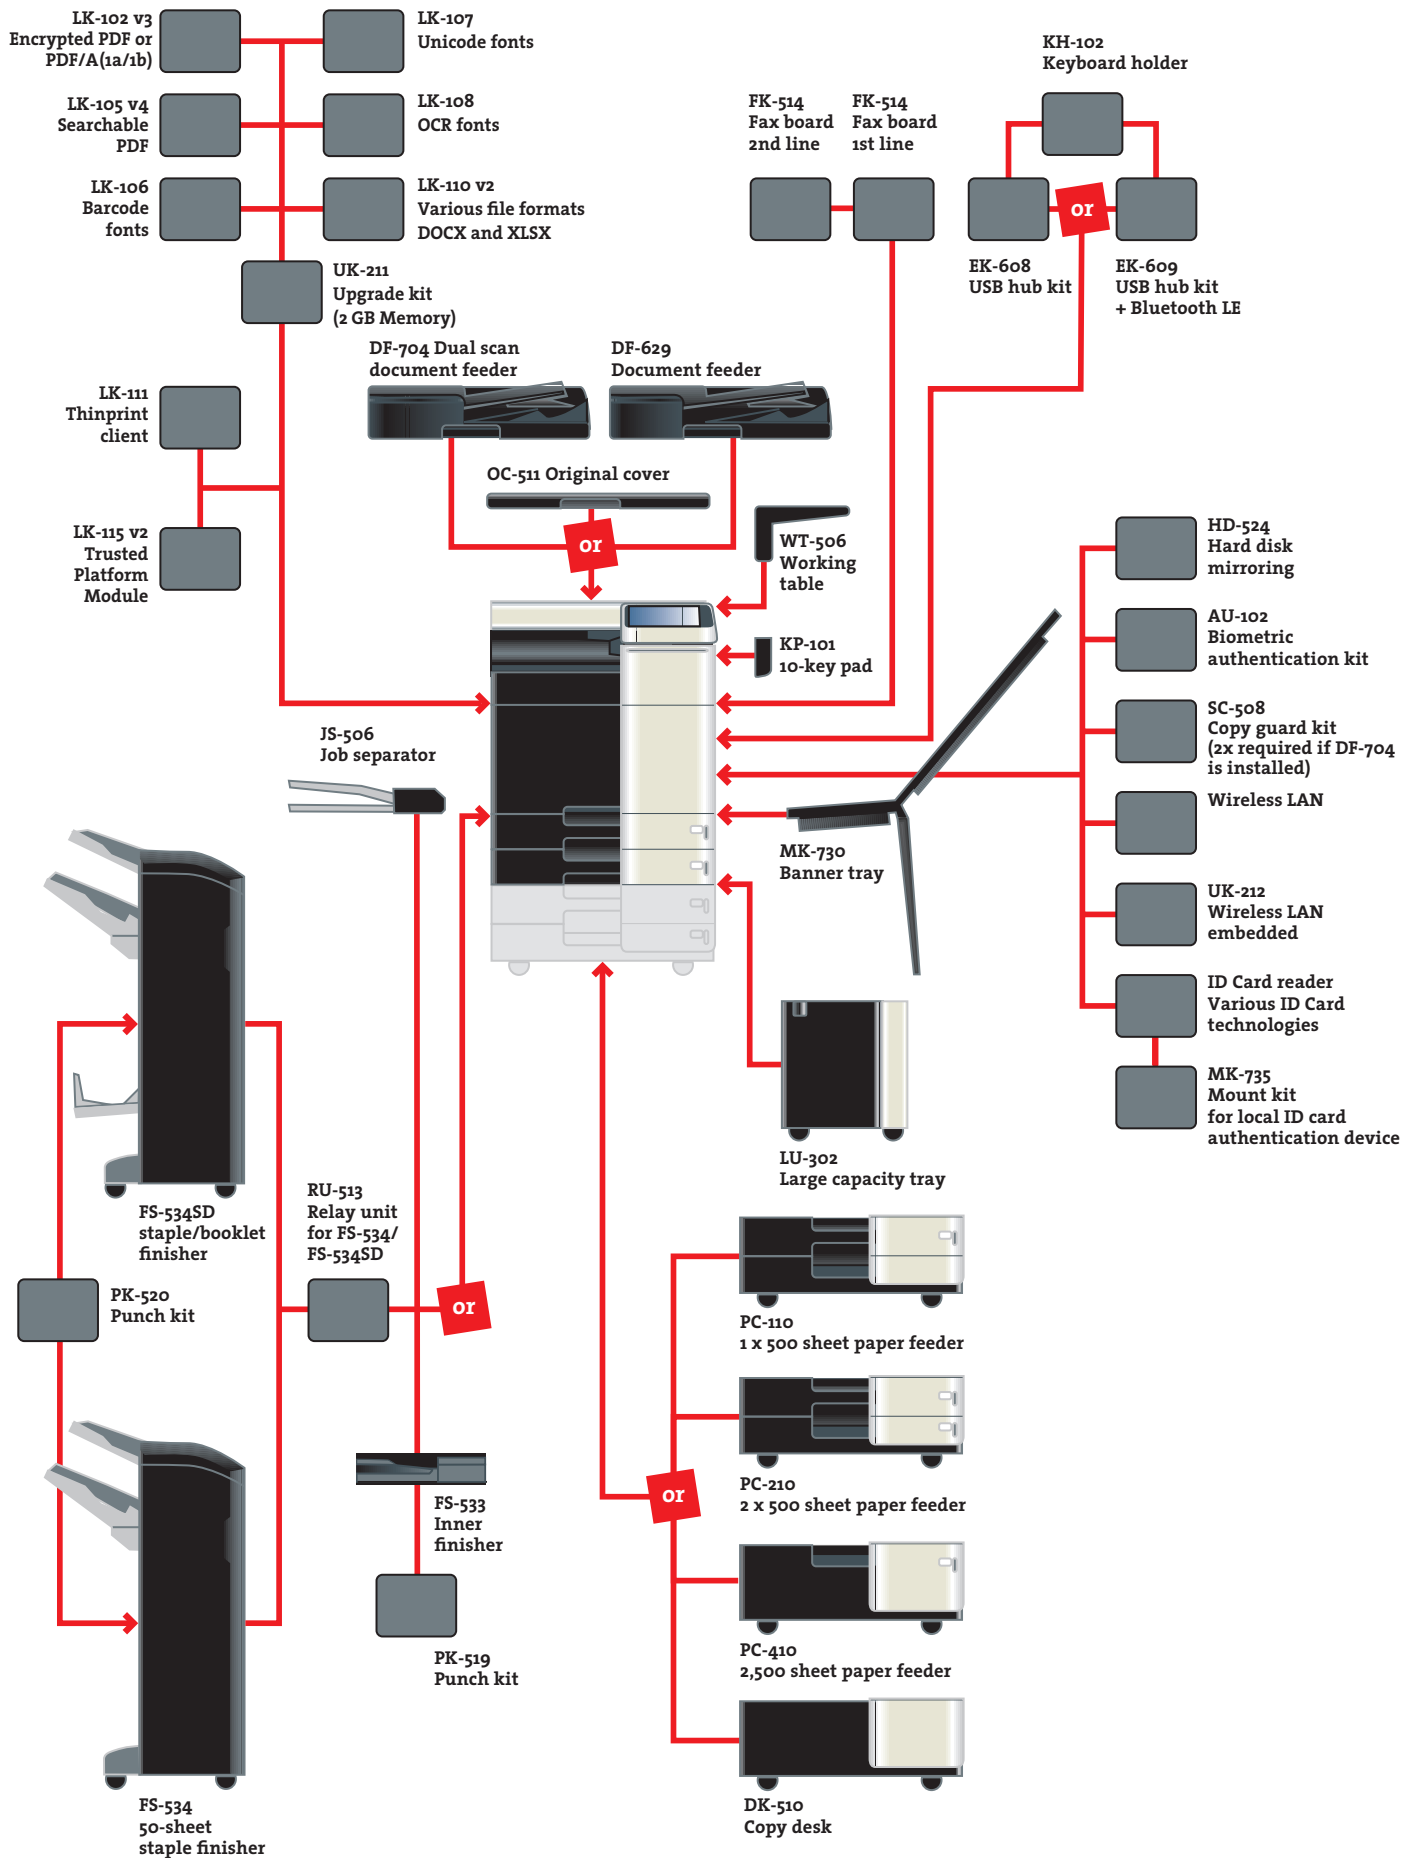

- › Web Connection gives each machine its own internal website for fast access to device status information and settings, including counter readings, supplies levels, user and administrator settings and more.
- › Print Status Notifier provides automatic job status alerts to your desktop computer. For example, it will alert a user via a popup when their document has finished printing.
- › Data Administrator handles addresses, passwords and accounts with ease.
- › Box Operator lets you download and access User Box data from your PC.

ineoPRINT from DEVELOP: an innovative solution for the needs of today's mobile workforce

With business becoming increasingly more mobile, there is growing demand for greater flexibility in printing or scanning hardcopy documents. ineoPRINT, with its assortment of utilities, is an innovative solution that gives you greater freedom in printing, scanning and managing documents.

With ineoPRINT in your organisation's network environment, you'll enjoy all the convenience and flexibility of directly printing-to and scanning-from, any iOS or Android mobile device.

> 500-sheet universal cassette (A5–A3, 52–256 g/m²)

> 500-sheet universal cassette (A5–SRA3, 52–256 g/m²)

> 150-sheet bypass (A6–SRA3, custom sizes, banner, 60–300 g/m²)

Paper format

A6–SRA3, customised paper sizes; banner paper, max. 1,200 x 297 mm

Printable area

Max. 307.1 x 437.1 mm (SRA3)

Max. 291 x 1,193 mm (banner paper)

Warm-up time

20 seconds or less

Dimensions (w x h x d)

615 x 779 x 685 mm (without options)

Weight

Approx. 85 kg (without options)

Power

220–240 V, 50/60 Hz

PRINTER SPECIFICATIONS

Controller

Embedded controller with 1.2 GHz

Memory

Standard controller uses system memory / hard disk (2 GB RAM/250 GB hard disk)

Resolution

Max. 1,800 x 600 dpi (with Smoothing Technology)

High quality mode: 1,200 x 1,200 dpi

Network protocols

TCP/IP (IPv4/IPv6), IPX/SPX, SMB, NetBEUI, LPD, SNMP, HTTP/HTTPS, IPP, AppleTalk, EtherTalk, LDAP

Emulation

PCL 5c, PCL 6, PS 3, XPS

Interfaces

Ethernet 10 BaseT/100 BaseTX/1000 BaseT, USB 2.0, Wi-Fi 802.11b/g/n (optional)

Driver

Windows Vista/Vistax64/7/7x64/

8/8x64/10/10x64,

Windows Server 2003/2003x64/2008/

2008x64/2008 R2x64/2012x64/2012 R2,

Mac OS X 10.x, Unix, Linux, Citrix

Print functions

Direct print of PCL, PS, TIFF, XPS, OOXML and PDF documents, overlay, cover page, watermark, carbon copy, mixmedia and mixplex, banner print

Mobile printing

AirPrint (iOS), Mopria (Android), Google Cloud Print (optional), ineoPRINT (iOS & Android), WiFi Direct (optional)

SCAN SPECIFICATIONS

Type of scanning

Scan-to-E-mail/FTP/Box (HDD)/PC (SMB)/ WebDAV/Me/Home/USB/DPWS, Network TWAIN

Resolution

Max. 600 dpi

Scanning speed

Max. 160 ipm (colour/black & white)

Size of originals

Max. A3

Scanning formats

TIFF, PDF, Compact PDF, JPEG

Optional: PDF/A (1a/1b), Searchable PDF/PPTX/

DOCX/XLSX/PDF/A (1a/1b), Encrypted PDF,

Linearised PDF, XPS, Compact XPS, PPTX

Scan addresses

2,100, LDAP support

COPY SPECIFICATIONS

Document feeder

> Duplex document feeder (optional)

> 100 sheet, max. 128 g/m²

> A6 to A3

> Dual scan document feeder (optional)

> 100 sheet, max. 163 g/m²

> A6 to A3

Copy pre-selection

1–9,999

6.1 / 7.5 seconds (colour/black & white)

Memory

2 GB RAM

HDD

250 GB

Resolution

600 x 600 dpi

Copier functions

Chapter and cover mode, test copy, colour image adjustment, creative mode, poster mode, book copy, glossy copy, ID card copy, watermark, stamp, date/page stamp, copy protection, 2-in-1/4-in-1/ 8-in-1, overlay (optional)

FAX SPECIFICATIONS (OPTIONAL)

Compatibility

G3/Super G3, MH, MR, MMR, J-BIG/ECM, IPFax (iFax standard)

Transfer rate/transfer speed

33.6 kBits/s, < 3 sec. ITU-No. 1

Fax memory

Uses system memory

Fax functions

Polling, time shift, PC-Fax, Receipt to confidential box, Receipt to E-mail, FTP, SMB

OPTIONS

> Dual scan document feeder (100-sheet)

> Duplex document feeder (100-sheet)

> Inner Finisher with 50-sheet multi-position stapling, stack capacity of max. 500 sheets, optional punch kit (2/4 hole)

> Floor Finisher for 50-sheet stapling: stack capacity of max. 3,200 sheets + 100 sheets via inner tray and punch kit (2/4-hole)

> Booklet finisher for 50-sheet stapling and booklet stapling: Stack capacity of max. 2,300 sheets, optional punch kit (2/4-hole)

> Job separator, max. 200 (150/50) sheet capacity

> Paper feed cabinet (500-sheet)

> Paper feed cabinet (2 x 500-sheet)

> Large capacity tray for 2,500 sheets (A4)

> Fax unit

SOFTWARE SOLUTIONS

> store+find (opt.), convert+share (opt.), Personal Applications (opt.), Enterprise Suite (opt.), Data Administrator (user accounts & cost centres), Unix/Linux support, SAP support, plus integration with many others (some optional).
