Exact speed varies depending on the system configuration, software program, and document complexity. ²Acoustic values are subject to change. For current information, see http://www.hp.com/support. Configuration tested: LaserJet Pro M1212nf MFP printing simplex on A4 paper. ³Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups. ⁴HP recommends that the number of pages per month of imaged output be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period. ⁵Based on standard ITU-1 test image #1 at standard resolution. More complicated pages or higher resolution will take longer and use more memory. ⁶Values subject to change. For current information. Power numbers are the highest values measured using all standard voltages. Default time from Ready-Mode to Auto-Off: 15 minutes. ⁷For Windows⁶ Server 2008 and Windows⁶ Server 2003, add Print and Scan drivers only. ⁶Measured according to ISO 7779 and declared in accordance with ISO 9296; values are subject to change. For current information, support. Configuration tested: LaserJet Pro M1212nf MFP printing simplex on A4 paper.
