

KONICA MINOLTA

bizhub C35P

Smart and Powerful in Colour
and Black and White

bizhub 

Fast and flexible on a small footprint

Small workgroups and teams in larger companies may require the convenience of a satellite printer for colour and black and white printing needs. Providing speed and confidentiality close to the workplace, the efficient bizhub C35P is a workgroup printer that perfectly complements larger output systems – whether as a small networked device or as a convenient desktop printer for instant output from one or more workstations.

- The bizhub C35P is very productive! This efficient A4 colour printer addresses any teams everyday printing needs with fast 30 ppm in colour or black and white as well as 100% performance in duplex printing.
- With the duplex unit incorporated as standard, the bizhub C35P boasts an impressively small footprint. Thanks to the design and generous range of above-its-class features, this compact and efficient printer integrates seamlessly into any bizhub product line-up.
- Equipped with high-definition Simitri®HD polymerised toner and 600 x 600 dpi x 3-bit resolution, it delivers truly impressive image quality, in colour or black and white.
- The bizhub C35P is compatible with most Windows, Mac and Linux environments thanks to the latest Emperon controller technology, standard Gigabit Ethernet, optional XPS support, as well as convenient administration via PageScope software tools.

Attractive versatility, **impressive results**

Small but powerful

With its small footprint and compact size, the bizhub C35P is the perfect desktop printer that is feature rich. Its printing speeds of 30 ppm colour and black and white and in combination with its fast first print time of just 12.9 seconds and its 100 percent duplex performance make it an ideal satellite printer to be installed close to where the work is. Delivering perfect results in an instant, the bizhub C35P enhances the productivity of any team or workgroup.

High performance

Like its multifunctional counterparts, the bizhub C35P uses the latest Emperon controller technology. Emperon controller technology means it can easily integrate with virtually any network, is compatible with standard operating systems and most business applications. Its 800 MHz page-processor plus standard 256MB RAM and Gigabit Ethernet enable it to perform like a business colour printer. PostScript and PCL are also available via the Emperon system and can be optionally extended to include XPS.

Enhanced functionality

Ensuring convenience, flexibility and ease of use, the bizhub C35P includes various PageScope tools and functionalities: PageScope Web Connection provides precise printer and consumables status information directly on the user's PC monitor. PageScope Data Administrator facilitates the allocation of user rights and output permissions, including restrictions to print in colour. This tool also allows easy monitoring of individual user volumes.

The important aspect of security is covered with Konica Minolta's comprehensive security functionality. Secure printing is of particular importance when sensitive data, including pay advices, need to be distributed.

Reliable remote monitoring

CS Remote Care is Konica Minolta's remote monitoring system for efficient communication between output devices and the Konica Minolta service team. Reducing the need for printer maintenance, this essential tool helps to avoid downtime of the printer, increasing the efficiency of the workgroup or team. CS Remote Care also automates the ordering of consumables and takes care of automatic service notifications.

Advanced media flexibility

The bizhub C35P's media handling capabilities are impressively versatile. Paper sizes A6 to A4 are processed via its standard paper feeder which, as with the duplex unit, supports paper weights between 60 and 210 gsm. An optional lower paper feeder increases the paper input capacity to a generous 850 sheets. Departments like human resources benefit from straightforward printing of envelopes, references and certificates, while controlling will find it easy to produce diagrams and flow charts, presentations or analysis. The convenient n-up feature helps to downsize printouts e.g. for filing, combining up to 16 pages of a document on a single sheet. Thanks to such media competence, the bizhub C35P is the ideal choice for small workgroups that need to print an extensive variety of documents.

¹ Optional CF card enables direct printing (PDF, TIFF, JPEG), downloading fonts/profiles/overlays, collating, PageScope Account Manager, PDF direct print.

² Optional hard disc kit enables secure printing, proof-then-print, print & hold, job storing, XPS emulation and using downloaded profiles in addition to all extra functions with CF card.

All specifications relating to paper capacity refer to A4-size paper of 80 gsm quality.

All specifications relating to printing speeds refer to A4-size paper that is printed crosswise in multipage/simplex mode.

The support and availability of the listed specifications and functionalities varies depending on operating systems, applications, network protocols as well as network and system configurations.

The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (5% coverage of A4). The actual consumables life will vary depending on the use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity.

Some of the product illustrations contain optional accessories.

Specifications and accessories are based on the information available at the time of printing, and are subject to change without notice.

Konica Minolta does not warrant that any prices or specifications mentioned will be error-free.
