bizhub PRO C1060L:

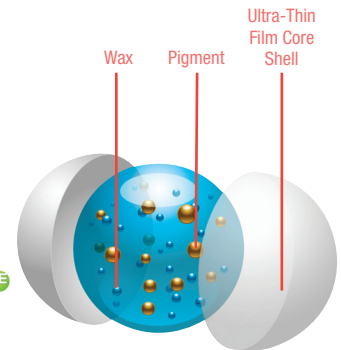

BRILLIANT QUALITY, DIGITAL STABILITY AND LOW-COST PRODUCTION

For light production, instant printing and corporate central reprographic applications, the bizhub PRO C1060L provides brilliant color, low-cost performance and purpose-built reliability – with high-speed output and digital advantages to keep customers coming back for more. And operation is simple, with a large color touchscreen for hands-on job management without the need for special training.

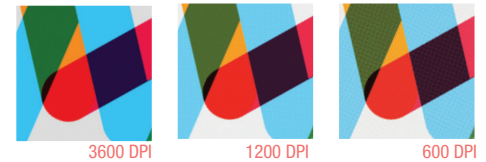

Simitri HD^E Toner: Konica Minolta's exclusive Simitri HD^E toner formulation uses smaller and more consistent particles and an ultra-thin core shell allows toner particles to fuse more quickly.

Simitri HD^E

SEAD IV and DPC: Dot Position Control gives your images smoother edges and superb color density without moires or distortion by reaching a highly stable equivalent of 3600 dpi.

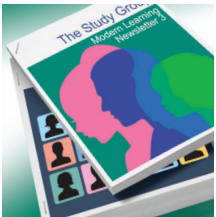

High-speed color output – that rivals offset printing.

Now you can offer your commercial and corporate clients high-speed 60 ppm print/copy output, with color quality to rival offset printing at a fraction of the cost – from a purpose-built professional engine that takes up less space on your production floor.

Konica Minolta's bizhub PRO C1060L gets the job done with Simitri HD^E toner, our exclusive 3-dimensional hybrid polymer innovation that fuses to paper surface at lower temperature and adheres more precisely to rough paper surfaces. The result? Beautiful, natural luster on both glossy and matte stock.

Along with superior color, you'll have smoother edges, greater legibility in fine text, and advanced 3600 dpi screen processing that virtually eliminates granularity or moiré distortion. Our Screen-Enhancing Active Digital (SEAD IV) processing combines highly accurate laser exposure controls, ultra-fine Dot Position Control (DPC) pixel placement, and multi-bit screening to achieve 3,600 dpi equivalent resolution. And sophisticated ASIC (Application-Specific Integrated Circuit) technology retains high-level image quality with fully digital control, for stability you can count on through long color press runs.

Adjustable outline processing and image smoothing control fine-tunes your output depending on the needs of each original. A sophisticated shift mechanism increases front-to-back registration accuracy. And our enhanced color output feedback system measures both CMYK and RGB color, for more accurate color feedback when your job calls for the use of an external spectrophotometer.

Production design for high-volume performance.

To keep work flowing, our state-of-the-art aluminum die-cast laser unit delivers dependable performance hour after hour – with long-lasting parts and high-yield consumables that require less operator intervention. Our print-head design features one-chip, eight-beam laser system for superior accuracy. Enhanced de-curling adjustments handle even the most challenging paper stocks.

Speaking of paper, you'll have all you need: up to 4,000-sheet maximum paper capacity in sizes up to 13" x 19" for oversized color spreads and proofs that retain borders and crop marks. The wider paper path of the bizhub PRO C1060L lets you run stocks up to 300 GSM in both simplex and duplex mode, so you can handle a broad range of substrates – even print on envelopes.

Comprehensive in-line finishing options include the compact FS-531 Staple Finisher, for 50-sheet corner or 2-point stapling with advanced stacking alignment. The FS-612 Multi-Function Finisher combines 50-sheet stapling with 80-page saddle-stitch booklet-making, center-fold and letter-fold capabilities, and punch kit and post-insertion options.

Simple control to reduce operating costs.

Controlling all this production power has never been easier. A large 15" color touchscreen provides a comprehensive user guide for hands-on job management without the need for special training. Familiar PC-like operation, hand-held mouse support and simple pull-down menus give you point-and-click control of printing and finishing functions. A real-time panel makes remote control operation quick and intuitive – and a paper catalog is available on screen, with information you can load and update via web-based or USB data input.

Konica Minolta's custom-designed internal IC-602 Image Controller option speeds your work with fast processing and data transfer. Job management from your control panel allows you to make color adjustments and change pagination for RIP-completed jobs, display current and reserved jobs for scheduling, sort jobs by a wide range of criteria, edit job tickets and much more. You can also edit page images on your touchscreen before you print, preview inserted images to verify correct settings, manage print queues, schedule jobs, confirm reserved jobs and more – all the working tools you'll need to maintain maximum productivity at times of peak demand.

The Fiery IC-415 Internal Image Controller option fits superior performance in compact bizhub PRO C1060L design, for fast and simple entry-level color production or in-house, on-demand corporate printing.

Fast scanning with enhanced security.

The bizhub PRO C1060L supports the optional Auto Document Feeder (DF-626) for high-speed throughput to help you digitize and distribute hard-copy originals, bringing print/copy jobs into your workflow faster. A built-in HDD with expanded memory provides on-board document storage – a real advantage for quickly updating and reprinting print jobs.

**PAGESCOPE
SOFTWARE**

The bizhub PRO C1060L incorporates the speed and convenience of PageScope Enterprise Suite to integrate account management, authentication and end-user settings at each user's control panel. PageScope Web Connection allows you to check device status from your browser. PageScope Direct Print lets you quickly put PDF or TIFF files into production without going through print drivers. And with Konica Minolta's AU-201 ID Card Authentication option, you'll be able to control access to your bizhub PRO printer using standard ID card systems.

FOR ALL YOUR DOCUMENT NEEDS

COUNT ON KONICA MINOLTA

Trusted by print professionals, Konica Minolta Business Solutions U.S.A., Inc. is a leader in advanced digital production technologies and IT Services. We've earned numerous awards and recognition, including being recognized as the #1 Brand for Customer Loyalty in the MFP Office Copier Market by Brand Keys for six years in a row. For the fourth consecutive year, Buyers Laboratory LLC (BLI) has named Konica Minolta as the winner of its "A3 MFP Line of the Year" award. In 2012, Konica Minolta also received "Document Imaging Solutions Line of the Year" recognition from BLI. Konica Minolta, Inc., has also been named to the Dow Jones Sustainability World Index for two years in a row. We are proud of our record of achievement – and we invite you to learn first-hand why you can always count on Konica Minolta. For more information, visit: www.CountOnKonicaMinolta.com
