Pro C901 / C901s

GRAPHIC ARTS EDITION

Maximum productivity for high-volume environments

*Achieve new standards in quality, speed,
and performance across all workflows.*

The power to meet any high-volume challenge

Trust the LANIER® Pro C901/C901s Graphic Arts Edition to deliver exceptional quality and performance no matter how large or complex your applications. Robust engine construction provides the reliability and durability your production-class environment needs. Wide media versatility and professional in-line finishing options expand the range of jobs that you can accept. Powerful EFI Fiery print controllers offer advanced color and job management tools to execute sophisticated document assembly and VDP workflows with ease. The LANIER Pro C901s adds integrated full-color scanning, copying, and document storage to meet image-capture and print-on-demand requirements. Both systems also employ Lanier's next-generation oil-free imaging technologies to produce output with near-offset quality while minimizing costs. The LANIER Pro C901/C901s—it's up to any challenge.

Full Speed Ahead

A number of technologies enable high-quality imaging on a wide range of media with maximum output speed.

- Print at 90 pages-per-minute regardless of media type, weight or when duplexing—and always at true 1200 x 1200 dpi resolution for outstanding quality.
- Realize near-offset results with Lanier's PxP™ chemical toners and oil-free fusing technology. Smaller, more uniform toner particles deliver sharper images and better fills with a matte finish for commercial-quality output.
- Quickly replace high-capacity toner bottles while running and reload paper trays while printing for uninterrupted performance.
- Achieve consistent image quality with advanced image stabilization, single direction development, mechanical paper registration, enhanced fusing technologies, automatic calibration adjustments, and more.

Eliminate Media Limitations

A wide variety of media handling features lets you print onto any stock with confidence.

- Execute full-bleed printing with support for media sizes up to 13" x 19". Expand system capacity with up to 7 media pick points and a maximum of 11,000 sheets for unmatched productivity and versatility.
- Create durable direct mail, cards, menus, and covers for booklets and manuals with support for heavy and textured media. Even duplex onto stocks up to 300 g/m² without any loss in speed!

Pro C901/C901s

Replace high-yield toner bottles in one step while the system is running for non-stop productivity.

- Use the new Paper Library feature to apply settings by selecting a preset or custom media type to optimize quality and minimize mistakes. This function integrates with the Fiery Paper Catalog on a connected EFI controller.
- Ensure precise paper feeding with Air-Assist Feeding technology while built-in De-Curling, Paper Registration, and Skew Control provide accurate registration.
- Enhanced fusing technology improves toner adhesion for superior quality when printing onto thick and textured stocks up to 300 g/m².
- Configure each system with professional in-line finishing options to fully automate advanced binding, punching, and stacking for up to 13,000 pages.

Production-Class Construction and Performance

Handle the toughest workloads and diverse workflows with maximum reliability and dependability.

- The welded steel frame provides exceptional strength to handle up to 350,000 impressions per month.
- Reduce costs and maintenance requirements with long-lasting supplies and consumables. Each toner bottle is replaced individually in seconds and yields up to 63,000 pages at a realistic 8.75% coverage factor.
- Operate at peak efficiency with Trained Customer Replaceable Units (TCRUs) that maximize system uptime by enabling trained customers to replace key imaging components without waiting for service.
- Process volumes of hardcopy originals with a full suite of image capture, digital copying, print-on-demand, and electronic document distribution functions.
- Command attention with an elevated Operator Call Light that's visible from any point of view.

The LANIER Pro C901 is flexible enough to enhance color capacity for in-plant centralized reproduction departments (CRDs) and commercial printers. Or choose the LANIER Pro C901s to accommodate requirements for scanning and copying.

Robust performance in a modular design

Configure the versatile LANIER Pro C901/C901s to meet your specific workflow requirements.

Professional In-line Finishing Capabilities

Choose from a variety of finishing options to design a complete end-to-end document production solution that matches your applications. In-line finishing maximizes system speed and reduces labor costs, allowing your staff to be more productive and your business more profitable. The SR5000 Finisher (shown) brings production-level finishing to high-volume environments with 100-sheet multi-position stapling, optional hole punching, plus a 3,000-sheet Shift Tray for long periods of unattended operation. For more advanced finishing needs, the LANIER Pro C901/C901s offers these professional binding options:

- RB5000 Ring Binder: Automatically punches, collates and applies your choice of two ring sizes to 50-100 sheet documents.
- SR5020 Booklet Finisher: Offers multi-position stapling of up to 100 sheets, stacking of up to 2,500 sheets, saddle-stitch finishing and folding—plus an optional Trimmer Unit for a flush finished edge.
- GBC StreamPunch Pro: Provides a variety of interchangeable die sets to punch pages individually, then bind off-line.
- GB5000 Perfect Binder: Hot glues books up to 400 pages with cover, and three sided trim.
- Full Automatic In-line Booklet Maker: Lanier's partnership with Plockmatic International AB provides in-line finishing, folding and trimming of booklets up to 30 sheets.

Simplified Toner Replenishment

Easily replace high-yield toner bottles in one step. Featuring a sub-hopper design, users can replace supplies while the system is running for non-stop productivity.

High Capacity Stacker

Enable longer unattended jobs with a 5,000-sheet stacking capacity. Add a second optional High Capacity Stacker unit in a tandem configuration to provide an enormous 10,000-sheet stacking capacity. Each stacker includes one roll-away cart to easily move large volumes of output for off-line binding or packing and shipping. For added security, the stacker door can be locked when printing valuable documents such as financial instruments, voting ballots, diplomas, and coupons.

LANIER Pro C901/C901s Main Unit

Maximize productivity with 90-ppm/cpm output speeds. Solidly built for lasting value, this heavy-duty engine provides 1200 dpi image quality and supports media up to 300 g/m² at full rated speed. Lanier's integrated @Remote diagnostic solution automates meter reading and enables proactive service and support for maximum uptime.

User-Friendly Job Programming

The intuitive control panel features a full-color 10.4" touch-screen LCD and clearly organized function keys for simplified operation. Easily manage system functions and job queues, and with the Pro C901s, control copy/scan settings and preview document storage/print-on-demand tasks right at the device.

Elevated Operator Call Light

Visually alert operators to changes in system status for prompt attention.

High-Speed Full-Color Scanning with 100-Sheet ADF

Quickly capture hardcopy originals for copying, editing, storage, or electronic document distribution. The Automatic Document Feeder scans stacks of images as fast as 75 originals-per-minute in full-color, grayscale, or black & white to put users in total control of file size and image quality for every application. (Standard on the LANIER Pro C901s only.)

LANIER Pro C901/C901s Graphic Arts Edition

500-Sheet Multi-Bypass Tray

Conveniently feed stocks for inserts, colored pages, special media, or short-run jobs without changing an in-line paper source. The Multi-Bypass Tray rests on an optional 13" x 19" Large Capacity Tray.

4,000-Sheet Large Capacity Tray with Air-Assist Feeding

Dual 2,000-Sheet drawers accept media up to 13" x 19" for the production of full-bleed pages with space for crop marks and color bars. Built in Air-Assist technology provides reliable feeding of very thin as well as coated stocks up to 300 g/m² in weight. (Standard on the LANIER Pro C901s, optional on the LANIER Pro C901.)

Secondary Large Capacity Tray (Optional)

High-volume environments can add a second 4,000-Sheet Large Capacity Tray to raise media capacity to a maximum of 11,000 sheets for a virtually limitless supply. This option is required for configuration with the 500-Sheet Multi-Bypass Tray. Customers with 8.5" x 11" print-only workflows and mixed-media requirements can substitute the Letter Large Capacity Tray with three trays totaling 4,550 sheets.

Do more than ever before

The robust GW Controller Architecture manages and maintains all critical LANIER Pro C901/C901s operations and communications.

Proven Workflow Solutions for Every Application

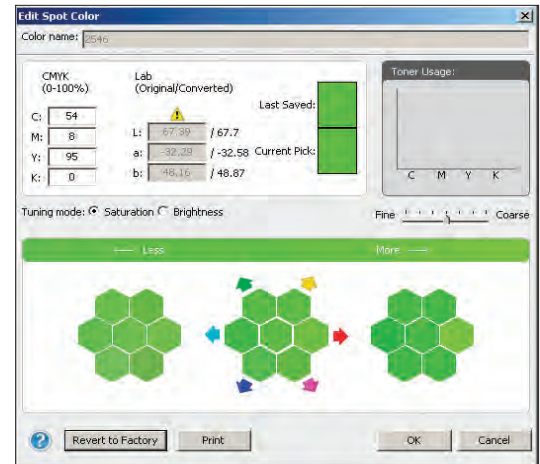

Lanier's premier GW Controller Architecture is the brain behind the Pro C901/C901s.

This powerful integrated controller is dedicated to maintaining optimal image quality and peripheral performance, managing media supplies, and enabling communication with administrators to securely configure network and device settings. In the LANIER Pro C901s, the GW Controller also manages the system's robust scanning, copying, and document storage and distribution feature sets.

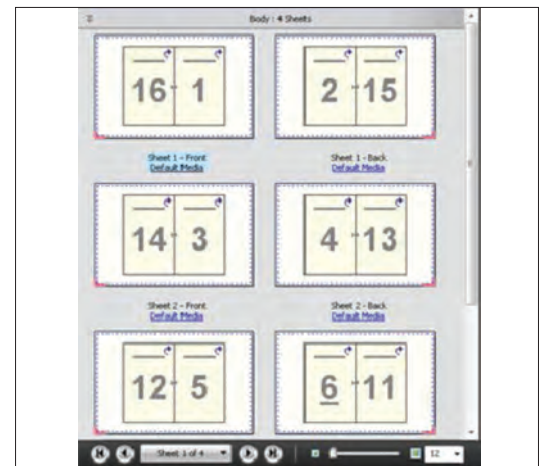

Fiery Print Controllers

Choose from two powerful EFI Print Controllers to suit your workflow, featuring the latest Fiery System 9 Release 2 software for total control over job processing and printing.

- Streamline print workflows with the latest job management tools such as EFI Command Workstation 5, HotFolders 3.0, Rush Printing, Virtual Printers, plus Fiery JDF support for job ticketing standards, and more.
- Generate accurate tones for precise color matching with other output devices or proofing applications with ColorWise Pro Tools and the Fiery Graphic Arts Package.
- Manage complex document assembly jobs with Fiery utilities such as SeeSequence Impose and BookletMaker 4.0 to simplify the production of paginated documents, define gang-up styles and delivery options, and more.
- Control advanced VDP workflows for personalized marketing campaigns in-house with support for EFI Fiery FreeForm and PPML.
- Access a complete suite of embedded Fiery scanning and document distribution capabilities for paperless workflows.

Process up to 250 spot colors per page—including C, M, Y, K—to create documents to your exacting standards for every application.

Standard SeeSequence Impose makes it easy to construct paginated documents using visual representations of page content.

The Total Green Solution

Lanier continues its long-standing commitment to developing solutions with environmentally friendly and superior energy- and supply-saving features, without compromising productivity.

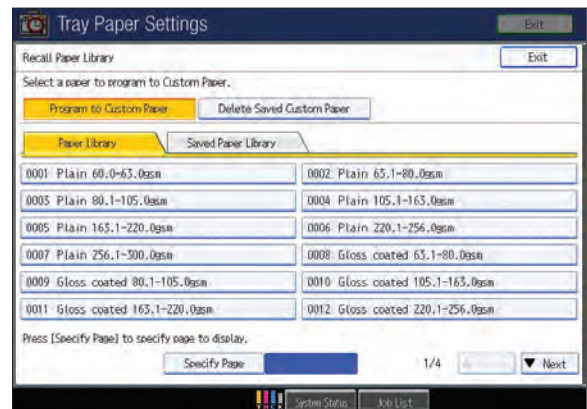

Optimize Performance for Color-Critical Applications

Production environments with more sophisticated applications can step up to the EFI Fiery E-81 Print Controller to manage every job with graphic arts quality and exceptional speed.

- Leverage the additional horsepower of the dual-processor architecture to speed the processing of large jobs. Simultaneously RIP one file while processing another for maximum throughput.
- Achieve precise color management with the standard Graphic Arts Package Premium Edition and other professional-grade tools for color calibration, matching, and proofing. Specify up to 250 Spot Colors per page, identify ICC profiles, and choose from a number of improved color simulation methods for exact color reproduction.
- Advanced EFI SeeSequence Impose and Compose utilities enable commercial printers to easily execute make-ready tasks, preview files, and create booklets and complex documents with mixed media, printed tabs, covers, inserts, and more.
- Generate error-free PDFs from any file with Adobe® PDF Print Engine (APPE). Eliminate missing graphic elements caused when files include tables, multiple layers, or text builds.

The RT5050 Large Capacity Tray can hold up to 4,000 sheets of 13" x 19" stock and can accommodate up to 300 g/m² with an Air-Assist Feeding mechanism to ensure reliable operation.

Manage up to 1,000 media profiles in the Paper Library to quickly match job parameters to media characteristics.
