LANIER

FAX 1190L

Designed for All-In-One Productivity

The right choice for small and mid-size offices that need versatile faxing plus other critical workflow tools.

Designed for All-In-One Productivity

Every office needs smart multifunctional technology to complete document tasks quickly and keep productivity high. For small- and mid-size offices, the LANIER® FAX 1190L delivers comprehensive faxing plus essential printing and copying features in a reliable, convenient and space-saving design.

Comprehensive Capabilities

The FAX 1190L is a cost-effective choice for satellite offices, home offices, independent businesses and executive suites.

- Rely on a single, well-equipped system for faxing, printing and convenience copying.
- Complete two tasks simultaneously — such as sending a fax and making a copy — with dual access.
- Send fax documents with the Super G3 modem and a transmission time of just two seconds-per-page. You can also use the built-in PC-Fax Send feature.
- Forward incoming documents to another fax with remote fax forwarding. It can be accessed remotely, so mobile users always get their documents.

Simple, Smart Design

This all-in-one system offers exceptional convenience and accessibility.

- Place this compact device right on the desktop, without taking up valuable space.
- Automatically resize incoming faxes. The system detects the paper size loaded in the tray, then reduces 8.5" x 14" faxes to fit.
- Easily transmit contracts, proposals and other documents (up to 8.5" x 14" in size) with the 20-Sheet Automatic Document Feeder.
- Hold received faxes in memory in case paper runs out while you are out of the office.

Economical Performance

Increase your personal productivity while maximizing cost-efficiency.

- Fax directly from your PC, without having to print documents first.
- Maintain separate phone and fax numbers on a single telephone line. Distinctive ringtones make it easy to differentiate phone calls from incoming faxes.*
- Reduce the risk of missing important faxes. Fax paging calls your cell phone or pager to let you know when a fax arrives.
- Save energy with sleep mode, which shuts the system down when it is not in use. A short warm-up time ensures incoming faxes will be printed quickly.

* Requires Distinctive Ringing option from your local phone company

Superior Ease of Use

- Send faxes to as many as 220 recipients with 20 One-Touch Dials, 200 Speed Dials and 8 Group Dials.
- Check the status of documents held in memory that are waiting to be sent.
- Print from your PC while you wait, or while sending or receiving a fax in memory.

SPECIFICATIONS

Type	Desktop
Recording Method	Laser
Modem Speed	33.6 Kbps (with Auto Fallback)
Maximum Transmit Speed	Approx. 2 sec.* (ITU-T Test Chart #1)
Data Compression	MH/MR/MMR/JBIG
