RISO ComColor® 7050/7010

Versatile, fast and reliable—now with FeedMAX® feeder

In your office or print shop, you operate in a high-speed environment. Your customers are demanding. They expect personalized communications that are both highly relevant and attuned to their needs. The documents you send them are a direct reflection on your company—and they can be critical to growing and maintaining relationships with your customers.

Adding color, promotional messages and personalization to customer documents and the envelopes you send them in can show your customers how important their business is to you. And, smart, eye-catching, relevant messaging can dramatically increase the value of your communications—and your customer relationships.

Combine a Riso ComColor printer with PlanetPress® and PB FIRST™ software, add an optional FeedMAX feeder, and you can customize your documents and envelopes, print in high-quality inkjet color, and produce your communications more efficiently than ever.

PlanetPress® and PB FIRST™ software enable you to add in customer-specific variable data, including conditional text, graphs and images. The RISO ComColor prints up to 120 pages per minute with no slowdown for duplexing. And by choosing the FeedMAX feeder you will gain the benefits of continuous loading capabilities.

With the RISO ColorCom 7050/7010 with FeedMAX® feeder, you can also even choose from any or all of three optional input and output conveyors. These input and output conveyors are suitable for both documents and envelopes, and they are available in 4-foot, 6-foot and 9-foot sizes.

Powerful communications

- **Fast.** Prints 120 ppm, and 1,000 full-color pages in 8 minutes with no slowdown when duplexing¹.
- **Cost-effective.** Black and white and color printing at about half the cost of laser-print production.
- **Compact.** Small in size and footprint, yet built for heavy-duty use and loaded with features normally seen in larger printers.
- **Flexible.** Prints on a wide range of stock including recycled paper, card stock and envelopes².
- **Mixed size printing**³. Enables automatic scanning and combining of various size originals into a single print job.

Powerful options

You can increase the power and flexibility of the ComColor® 7050 or 7010 printer with several options.

- **Scanning and copying.** Add this 600 dpi color scanner to your printer and you'll benefit from convenient color and monochrome copying. You'll be able to copy preprinted materials or scan them to incorporate them into documents on your computer.
- **Multifunction finisher.** Save time and trouble with this versatile finisher that helps you turn out professional-looking documents such as proposals, newsletters, mailers or workbooks. The finisher staples, folds booklets, and can 2- or 3- hole punch. Available with ComColor® 7050 only.
- **Multiple paper drawers.** For added versatility, the 7050 offers 3 paper drawers that can accommodate paper sizes up to 11" x 17" and a 2,500 sheet input capacity. For a single paper source and 1,000 sheet capacity, choose the 7010.
- **PostScript Controller (IS9000C).** This Adobe® PostScript® controller adds processing power and advanced print management functions such as forms printing, print queue management, archiving, and is ideal for larger graphics files.
- **The FeedMAX® feeder.** Our newest option, the FeedMAX adds even more versatility and productivity to the ComColor line. Its top-loading format enables continuous operation. It easily handles both envelopes and documents. It is available with optional input and output conveyors in 4-foot, 6-foot and 9-foot sizes. And, with its ability to continuously load the FeedMAX is ideal for large-volume print jobs.
