

RICOH Pro TF6250

✓ Flatbed □ Roll-fed □ Hybrid

Keep them coming back for more after every job

The RICOH Pro TF6250 Wide Format UV LED Flatbed Printer helps you drive greater profitability by making it easy to digitally produce a virtually endless range of products on rigid substrates up to 4.3" thick. Precise registration lets you create multi-layered and textured prints, or use tiled printing for oversized images on multiple boards. Wholly designed and developed by Ricoh, the system delivers outstanding image quality, productivity, automated daily maintenance and simple, low-cost operation — giving you the freedom to focus on meeting deadlines and growing your business.

Offer your customers more solutions

Produce more applications, from indoor and outdoor signage, backlit displays, POP displays, art reproductions, and event graphics to new, emerging applications including promotional items, murals and short-run specialty packaging. By making it possible to create an incredible assortment of high-value products from a single device, the RICOH Pro TF6250 is your fast-track to profitability.

Finish faster with the right ink configuration for your workflows

A dual-white ink configuration helps you keep production moving faster to speed critical turnaround times. The system offers up to 7-color printing with CMYK plus clear, white and primer. Ricoh's GREENGUARD-certified UV LED inks offer exceptional image quality up to 635 × 1800 dpi. Variabledrop printing enables smooth gradations, grayscale printing and sharp, accurate text.

Let Ricoh help you to increase ROI

We provide more than industry-leading technology — Ricoh offers the hands-on expertise you need to help your business grow. Our Professional Services experts can provide on-site operator instruction, color management, workflow, finishing and business development services to help you increase your revenue faster.

Unleash your creativity to help clients stand out with innovative shapes, sizes and materials.

Support for the media you count on

PVC, acrylic, styrene, wood, aluminum, corrugated, plastics and more — create products on a nearly endless variety of supported rigid media. The RICOH Pro TF6250 utilizes LED curing so you can print on thin materials without fear of warping while giving you the capability to print on substrates up to a remarkable 4.3" thick. A maximum printing area of 98.4" \times 51.2" accommodates 4' \times 8' sheets with full-bleed printing.

Meet demanding turnaround times

Twelve RICOH MH5421 printheads help you produce nearphotographic quality with print speeds of up to 1,248.6 ft²/hr in four-color draft mode and 516.7 ft²/hr in four-color standard mode. Eliminate mounting and trimming steps to satisfy lastminute client requests with the ability to print directly on substrates — including edge-to-edge printing — for signs, posters, backlit displays and more.

Easy and affordable operation

Master the system quickly and easily with intuitive controls to keep operators productive. The RICOH Pro TF6250 comes with user-friendly SAI® Photo Print RIP software, which supports multi-dpi printing and makes tiling, scaling, cropping and other tasks easier. Additional RIP compatibility to Onyx, Caldera & ColorGATE supported. Automated daily printhead carriage maintenance reduces hands-on time and extends uptime, while ensuring extraordinary print quality.
