### TAKING CARE OF BUSINESS SAFELY AND SECURELY

## Manage your device, help safeguard your data, help protect your business.

To help protect employees' privacy and intellectual property, these desktop color document systems are armed with secure access features to restrict and manage copy, print and scan features to protect data and control costs. Sharp document systems also offer user authentication, which when enabled requires walk-up users to logon to the MFP before access can be granted for copy, fax, or scan functions. A secure print release feature can also be enabled, which requires users to enter a PIN before documents can be printed, eliminating unclaimed jobs sitting on the printer.

These devices are equipped with network security to defend against unauthorized access over network interfaces. Hard disk security helps to safeguard information stored on the device against unauthorized access and hacking.

These scalable security offerings aim to protect your intellectual property, preserve confidential information and help your business meet regulatory requirements including the Health Insurance Portability and Accountability Act (HIPAA) and the Family Educational Rights and Privacy Act (FERPA). For additional information visit: <a href="https://www.sharpusa.com/security">www.sharpusa.com/security</a>.

SRDM makes it easy to view service logs, click counts, history reports and more. Event-driven service alerts help monitor the device and maximize uptime. The centrally managed **security dashboard** monitors security settings and can automatically reset the security policy if changed locally at the machine. Also, secure remote management provides a wide range of tools and device capabilities to effectively manage a fleet of networked printers and multifunction products to make sure they are always up to date.
